Creating a Bibliography in ProQuest RefWorks

You can easily create a bibliography from the **All Documents** area, any folder or your search results list.

Navigate to the folder you want to use (or **All Documents** area or run a search and select items) and click "Create Bibliography."

You can choose to create a bibliography for selected references or for all of the reference in the folder (or in **All Documents** if that's the view you are in).

Next, search for your output style and select it. Your formatted bibliography will be displayed in your browser for you to copy and paste into any word processing software.
